

Xarelto Surgery and Dental Checklist

Bring this to every appointment where a procedure is planned. Do not make changes on your own.

1. **Do not stop Xarelto by yourself.** Only the clinician managing your blood thinner decides when to pause it.
2. **Ask one question at booking:** who is responsible for giving me my stop and restart instructions?
3. **Write down the date and time of your last dose** before the procedure.
4. **Write down the date and time you are told to restart.**
5. **Tell every member of the team you take Xarelto (rivaroxaban),** especially before an epidural, spinal injection, or spinal tap.
6. **Call Fairview about any new medicine** started around the procedure: antibiotics, pain medicines, or anything new.

MY LAST DOSE (DATE AND TIME)

RESTART DATE AND TIME

WHO GAVE ME THESE INSTRUCTIONS

Questions at any step: Fairview Pharmacy, 601-544-4871. A licensed pharmacist answers.
